

Poona Community Infrastructure Planning

Today's presentation seeks to-

- inform newcomers to Poona of actions in past years to gain enhancements to Poona's infrastructure,
- answer questions raised at the November meeting concerning the boat ramp proposal,
- provide updates on actions with the support of our elected officials.

A PDF copy of the presentation and the video of Poona Ck (low water on a spring tide) will be available on the community webpage

<https://poonacommunity.com.au/poonaplanning.html>

Also on that webpage -

- the background and community agreement to progress the identified 10 pillars (incl a better boating facility)
- GHD Consultant's report on statewide boating infrastructure needs
- finalised Feasibility Study on the Poona Ck boat ramp site
- completed Archipelago project in formulating the Poona Community Infrastructure Plan
- results of final community engagement to obtain \$900k of boat ramp enhancements
- 'Appendix J' results of final boat ramp submissions to Council/TMR

Since the formation of the dedicated sub-committee in 2016 to address Poona's shortcomings insofar as infrastructure, considerable work has been undertaken to –

- engage with the community and take community inputs & suggestions
- research & analyse and formulate, with the community through workshops, the best course of action
- advocate and lobby on behalf of the community and work with the tiers of government to shape future plans for the town

As developments occur the community is kept informed via an email database. If you would like to register for the updates email the sub-committee
